PROJECT PRESENTATION · BANO QABIL HEAD OFFICE

KARACHI مسئلہ

Masla batao, hisaab lo.

An anonymous civic complaint and accountability platform that gives every person in Karachi a **safe voice**, and every department a **public scoreboard**.

ANONYMOUS · PUBLIC MAP · RANKED ON REAL DATA

PRESENTED BY

ALIYAN SALEEM

Designer & Developer · Masla-e-Karachi

VERSION · DATE

Pre-launch · October 2026

"Report the problem. Hold them accountable."

Karachi has problems. What it lacks is a safe way to be heard.

FEAR 01

“Who do I even complain to?”

Water, sewerage, roads, garbage, power and gas sit with six different agencies. Most people never learn which door to knock on.

FEAR 02

“What if they find out it was me?”

The fear of being identified silences people long before they write a single word, especially for sensitive issues like extortion and illegal dens.

FEAR 03

“Did anything ever happen?”

Complaints disappear. No tracking, no reply, no consequence, so people stop trying and the problem stays.

OPEN GUTTERS · BROKEN ROADS · UNCOLLECTED GARBAGE · DRY TAPS · DEAD STREETLIGHTS · GAS LEAKS · DANGEROUS WIRES

> It is not that nobody cares. The system just gives nobody a safe, visible and trackable way to speak.

One place to report, see and follow up.

Masla-e-Karachi lets anyone in the city report a civic problem with a **photo and a location**, with no login and no name.

The platform finds the **responsible department automatically**, shows the problem publicly on a map, and ranks departments on **real results**.

HONEST BY DESIGN

It cannot force a department to act. Its power is **public transparency**: nothing stays hidden, and a department that does nothing shows up in the ranking.

01

Anonymity

No name, phone, email or account. Reporting should never be a risk.

02

Accountability

Departments are scored on resolution rate, speed, overdue and reopened cases.

03

Transparency

The problem, the responsible department and every step are visible to all.

04

Recognition

Good work earns public credit through before/after proof and honest ranking.

From a photo to a result in five moves.

1

CITIZEN

Reports

Picks a category, drops a pin, adds a photo and a short description. Gets a private tracking code.

2

MODERATOR

Reviews

A human checks every report. Fake, duplicate or unsuitable ones never go public.

3

PUBLIC

Sees it

The complaint appears on the feed and map with the responsible department named. A 7-day clock starts.

4

DEPARTMENT

Resolves

An officer marks it In Progress, fixes it and uploads an after-photo as proof.

5

COMMUNITY

Confirms

Neighbours vote on whether it is truly fixed. A fake fix gets reopened and hurts the ranking.

0 names, phone numbers or emails collected from reporters.

6 departments connected: KWSC, KMC, SSWMB, K-Electric, SSGC, Karachi Police.

7 days before an unresolved complaint turns Overdue and the department is emailed.

Four steps. No account. No name.

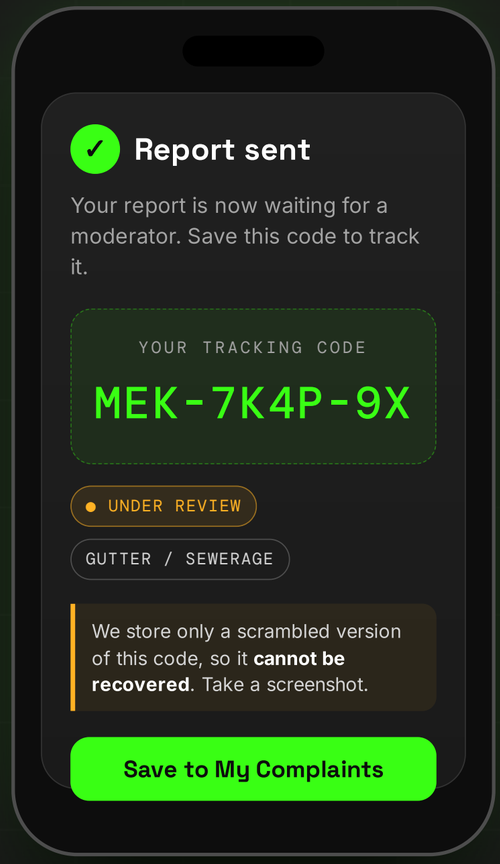

1 **Choose a category**
8 categories, each with an example, so the right department is picked automatically.

2 **Pin the location**
Use “My location” or tap the map. Must be inside Karachi. A smart check shows similar reports within 150 m so people can say “me too”.

3 **Add a photo**
Required, up to 4 MB. GPS, phone model and time are stripped from the file before it is saved.

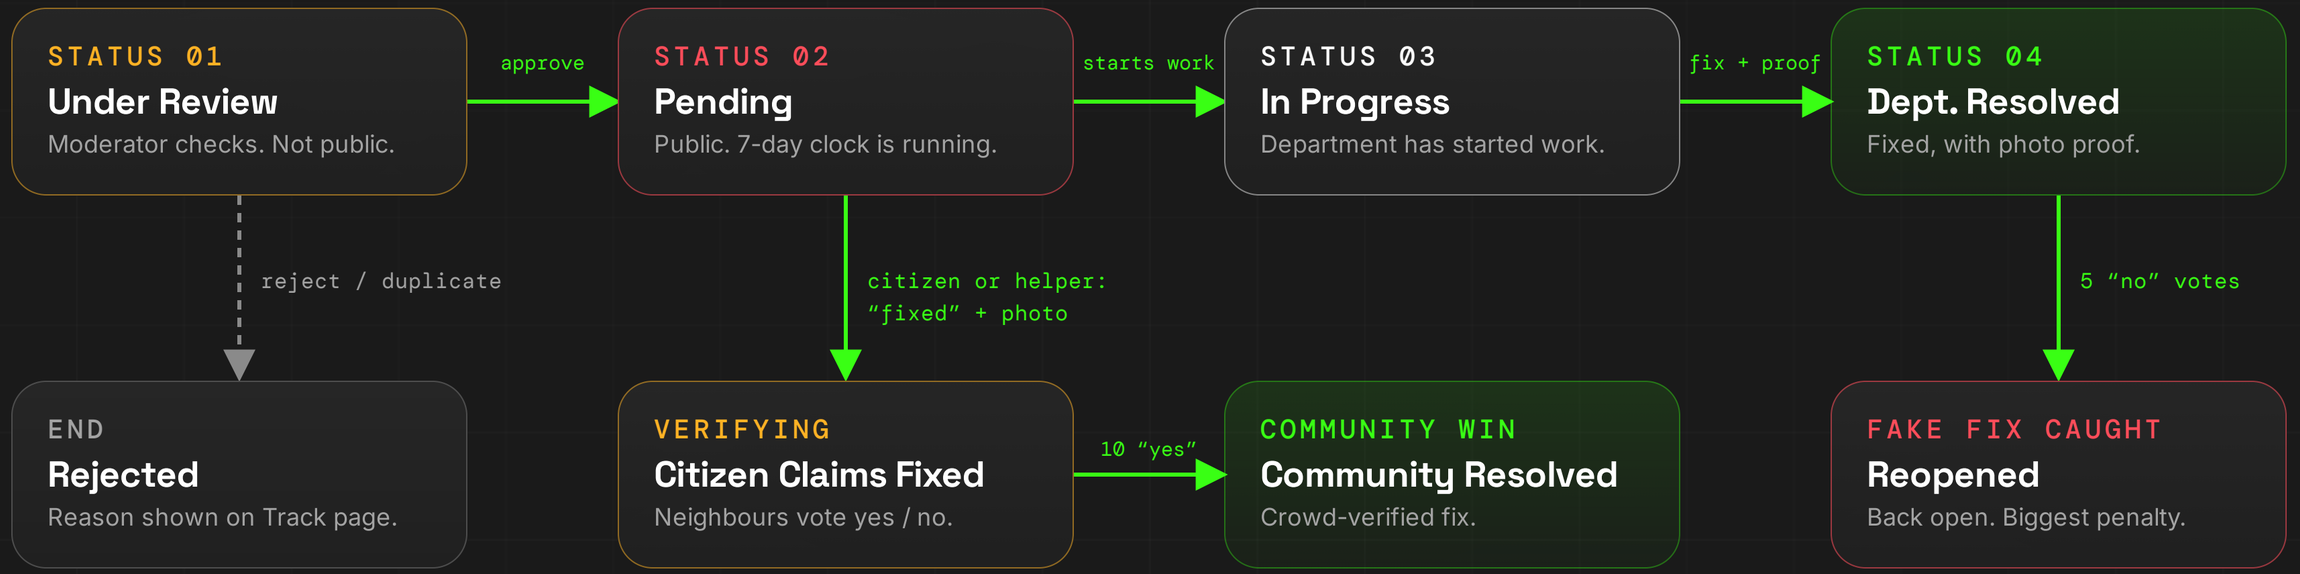

4 **Describe it in 10–500 characters**
Where it is, what happened, how long it has been like this. Then a quick bot check and submit.

GUTTER / SEWERAGE · ROAD / POTHOLES · GARBAGE · WATER SUPPLY · ELECTRICITY · GAS · STREET LIGHT · ILLEGAL ACTIVITY · SENSITIVE

Every complaint has a visible journey.

Status colours follow one rule across the whole platform: OPEN · IN REVIEW · RESPONDED · RESOLVED

DAY 7 **Overdue:** a red flag appears, the department is emailed automatically, and its ranking drops. A daily job runs at 8 AM Pakistan time.

Six departments. One public scoreboard.

KWSC
Karachi Water & Sewerage Corporation

Gutters · Water supply

KMC
Karachi Metropolitan Corporation

Roads · Potholes · Default

SSWMB
Sindh Solid Waste Management Board

Garbage · Illegal dumping

K-Electric
Electric utility

Power · Street lights

SSGC
Sui Southern Gas Company

Gas supply · Leaks

Karachi Police
Sensitive reports only

Not counted in scoreboards

Auto-routing: area + category rule, then category rule, then the department's list. No match? KMC receives it, so no complaint is ever ownerless. New departments are added from the database, no redeploy.

THE SCORE · RESULTS ONLY

Resolved % − (2 × avg days) − (3 × overdue) − (5 × reopened)

Example: 4 complaints, 3 resolved (75%), average 2 days, 1 overdue, 0 reopened.

`75 − 4 − 3 − 0 =` **68.0**

BUILT TO BE FAIR

- ✓ **No likes or votes** in the score, so rankings can't be gamed.
- ✓ The clock starts at **public approval**, not at submission.
- ✓ Citizen or helper fixes **don't help or hurt** a department.
- ✓ Duplicates never count against anyone. Pick week, month, year or all-time.

Citizens become the verification layer.

WHAT ANY RESIDENT CAN DO · NO LOGIN

+1 “I have this problem too”
Raises the affected count so departments see how many people a problem touches.

✓ “Mark as fixed”
Upload an after-photo. The complaint enters public verification.

⇅ Yes / No vote
One vote per device per round, with a bot check on every vote.

10
“yes” votes confirm a fix

5
“no” votes reject it or reopen it

HELPERS · VERIFIED PEOPLE & NGOs WHO FIX THINGS

01 **Claim** a complaint: 14-day window, max 5 active claims.

02 **Fix it** and upload an after-photo as proof.

03 **Community verifies** with the same yes / no vote.

04 **Public credit** on the complaint, the /helpers page and Success Stories.

Helpers are created and verified by an admin. New helpers wear a “new” badge and their **first 3 fixes are reviewed by a moderator**. Political-party helpers are not allowed by default. Sensitive complaints can never be claimed.

HONEST LIMIT

Voting is per device, not per login, so a determined person could try many browsers. Bot checks, rate limits and moderator review of new helpers are the safeguards, and stronger options are on the roadmap.

The reporter’s safety comes first. Always.

01
No identity
No account, name, email or phone. Ever.

02
Clean photos
EXIF data (GPS, device, time) is removed and images are resized on upload.

03
Hashed codes
Tracking codes are stored as HMAC hashes, so even database readers can’t see them.

04
Rotating IP hash
Only a hash that changes daily is kept, for spam control, never linked to a complaint.

05
Human moderation
Every report is reviewed before it goes public. Every decision is audit-logged.

06
Row-level security
RLS on every database table. Browsers have no direct database access.

07
Hardened web
HTTPS, CSP, HSTS, bot checks and rate limits on report, vote, upload and track.

08
Role separation
Officers see only their own department. Moderators can’t act as a department.

SENSITIVE MODE

For extortion (bhatta) and illegal dens, the **text, photo and exact location stay private**. The public sees only “Location withheld”, a moderator opens the photo through a **60-second signed link**, and every view is logged. Share previews show nothing at all.

Engineered like a production system.

LAYER 1 · CLIENT

Any phone or computer, installable as a PWA

English + Urdu (RTL, Nastaliq font) · mobile-first · offline page

▼

LAYER 2 · APPLICATION

Next.js 16 · React 19 · TypeScript · Tailwind CSS 4

24 API routes · rules, voting, routing, moderation, rankings

▼

LAYER 3 · DATA

Supabase · PostgreSQL + private/public photo storage

13 migrations · row-level security on every table

VERCEL · HOSTING + DAILY CRON | CLOUDFLARE TURNSTILE | RESEND EMAIL | LEAFLET + OPENSTREETMAP | SHARP | VITEST

24k
lines of TypeScript in the app source

526
automated tests across 43 files, all passing

976
text strings, matched in English and Urdu

0
type errors, lint errors and production-dependency vulnerabilities

All checks run on 12 October 2026 · production build succeeds

Also built: a separate **landing website** in plain HTML, CSS and JavaScript (6 pages, zero build step), built for GitHub Pages, introducing the idea ahead of launch.

One broken gutter cover. Eight days.

ILLUSTRATIVE EXAMPLE, NOT A REAL COMPLAINT

D1

MORNING

Ali reports

Category: Gutter. Pins his street. The system shows no similar report within 150 m. He adds a photo and gets `MEK-7K4P-9X`.

D1

AFTERNOON

Approved

The moderator sees no red flags and approves. It goes public, assigned to **KWSC**. Two neighbours tap “me too”.

D3

IN PROGRESS

KWSC responds

The officer marks it In Progress. Ali’s phone shows “Status updated”, with no calls and no chasing.

D5

RESOLVED

A new cover

After-photo uploaded. Neighbours vote. No one objects, so the fix stands.

★

IMPACT

Score goes up

KWSC’s resolution rate and speed improve. The case joins **Success Stories** with before/after photos.

IF KWSC DID NOTHING

On day 8 the complaint turns **Overdue**, a red flag appears, KWSC is emailed and its ranking falls. Ali or a verified helper can still fix it and claim credit.

The code is ready. Next: go live.

READY TODAY

- ✓ Reporting, tracking, moderation
- ✓ Public feed, map, areas, rankings
- ✓ Voting, helpers, success stories
- ✓ Officer dashboard and audit log
- ✓ English + Urdu (RTL)
- ✓ Sensitive-report protection
- ✓ Daily overdue job + email code

BEFORE GO-LIVE · 6 STEPS

01 **Database:** run 13 migrations, policies, seed departments, test RLS

02 **Bot check:** set up Turnstile on the live domain

03 **Email:** verify sending domain, add department contacts

04 **Accounts:** first admin, officer tokens, verified helpers

05 **Secrets:** set environment keys and cron secret on Vercel

06 **Real-device test:** report, vote, share, claim, Urdu RTL

NEXT AFTER LAUNCH

- → Personal officer accounts and token expiry
- → Admin tab to manage helpers
- → Stronger vote-integrity options
- → Safe video processing
- → Native mobile app (“Coming Soon” page exists)

THE PARTNERSHIP

Going live with Bano Qabil

Launching through Bano Qabil gives Karachi’s youth a platform that runs on **real city data**: reporters, helpers and volunteers working together on problems they actually live with.
